

FREQUENTLY ASKED QUESTIONS

Q: What does it mean to be computer adaptive?

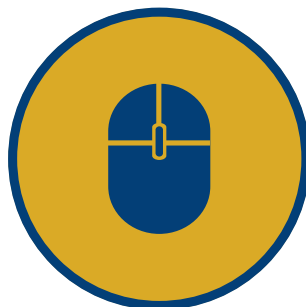

A: Computer adaptive tests adjust to each student's learning level, providing a unique set of test questions based on their responses to previous questions. As the student responds to questions, the test responds to the student, adjusting up or down in difficulty.

Q: What subjects are available with MAP growth?

A: There are MAP Growth tests for grades 2 – 12 in reading, language usage, math, and science.

There are also primary grades tests for grades K – 2, referred to as MAP Growth K-2, in reading and math. With these child-friendly tests for young learners, students wear headphones, since many questions include audio to assist those who are still learning to read.

Q: How often will my child take MAP growth tests?

A: Most schools give MAP Growth tests to students at the beginning, middle, and end of the school year. Some schools have students take MAP Growth tests at other times throughout the year.

Q: How long are the MAP tests?

A: Most students take less than an hour to complete a MAP Growth test. However, MAP tests are not timed, and students may take as much time as they need to complete it.
